ZURICH, TUESDAY, JANUARY 8, 1985

Cambodia Guerrillas Lose Base

No. 31,689

Vietnamese Use Artillery, Tanks Against Ampil

AMPIL Cambodia - Viernamese forces drove their way into this major Cambodian resistance base Monday, pounding the camp with artillery and breaching its defenses with tanks and infantrymen, guerrilla officers said. Hand-to-hand combat was re-

ported as about 1.000 Vietnamese troops sought to overrun Ampil. headquarters of the non-Cor nist Khmer People's National Liberation Front. At least 20 guerrillas were killed

and parts of the base were de-stroyed, according to intelligence sources in the Thai Army's Eastern Task Force. About three-quarters of the

camp was in Vietnamese hands late Monday, Lieutenant General Pichitr Kullavanijaya, commander of Thailand's 1st Army Region, said in Bangkok.

He said the Vietnamese did not gain much militarily because they failed to wipe out the guerrilla defenders, who split into small groups and slipped away. Sporadic fight-ing continued, he said.

The assault coincided with the sixth anniversary of the Vietnamese invasion force's entry into Phnom Penh to install a pro-Hanoi government and end the brutal reign of the Communist Khmer

Rouge. The Vietnamese laid down a huge artillery barrage before send-ing in tanks, Thai officers said. As many as 20 tanks were in action Monday, more than on any other. single day in six years of fighting on the Thai-Cambodian border.

Major General Salya Sriphen, the Thai Eastern Force commander. said the defenders destroyed three of the Soviet-supplied T-54 (Continued on Page 2, Col. 7)

Anti-Communist guerrillas pulled back Monday from an outer defense line around Ampil during a Vietnamese attack.

Peres Vows to Continue Ethiopian Rescue

The following dispatch was sub-mitted to the Israeli censor, who made one deletion.

JERUSALEM - Prime Miniser Shimon Peres, in his first public comment since the disclosure of the operation to airlift Ethiopian Jews to Israel, pledged Monday that Israel will not rest until it completes

the rescue mission. "I can say clearly that we shall not rest until all our brothers and sisters from Ethiopia are safely back home," Mr. Peres said at a foreign policy seminar at Jerusa-lem's Hebrew University in memory of the late Senator Henry M.

Jackson, a Washington Democrat. Zvi Eyal, a spokesman for the Jewish Agency, said that other air-lines had offered to continue the

TEA had flown about 7.000 Ethiopian Jews to Israel from Sudan on 35 flights since November, the Beigian transport minister said. The Times quoted Mr. Eyal as

saying that an estimated 4,000 Ethiopian Jews, or Falashas, were in transit camps in Sudan and between 8,000 and 10,000 in Ethiopia. The Jewish Agency is an indepen-dent organization which deals with immigration and the absorption of

The newspaper reported diplomatic speculation in Israel that "some military-style operation" may be organized to rescue at Ethiopia. least the 4,000 starving and disease- Accordi

ridden Falashas in Sudan." Other sources have said, howevthrough which the Jewish refugees

nese and Ethiopian refugee camps. Mr. Peres said: "The purpose of

and return to their homeland," it cooperation in the operation, nomic considerations to bring

outside our own people," he said. The head of the Jewish Agency, Leon Dulzin, said in London that he hoped the rescue operation would be "capped with success" despite the publicity, the daily Ye-diot Ahronot reported Monday.

In an interview, Mr. Dulzin was quoted as saying that "we will have to wait a day or two and then see" if the airlift can be renewed.

He said the agency had decided to raise \$125 million from world Jewry to fund the Ethiopians' integration in Israel. The newspaper also quoted Mr. Dulzin as saying that the rescue efforts began four years ago and had brought about 7,000 Ethiopian Jews to Israel.

Sudan Accuses Ethiopia

Sudan accused Ethiopia Monday of rating its Jews for arms and money and denied that it had made any secret deal with Israel, Reuters reported from London.

A statement issued by the Su press reports that Sudan, which borders Ethiopia, had helped Israel According to legend, Jews have airlift thousands of Ethiopian Jews lived in Ethiopia for 2,500 years. It said the Marxist government

Shultz, Gromyko Meet On Weapons Control

By William Scally

GENEVA - George P. Shultz, the U.S. secretary of state, and Andrei A. Gromyko, the Soviet foreign minister, met for almost six and one-half hours in two sessions of talks Monday to seek an agenda for new negotiations on arms con-

substance of the talks, the first round of a two-day session.

Diplomats have said that the best outcome that could be expected would be a decision to resume arms negotiations suspended 13 months ago by the Soviet Union after members of the North Atlantic Treaty Organization began de-ploying U.S.-made cruise and Per-shing-2 missiles in West Europe.

But they have added that a more likely possibility would be an tween Mr. Shuliz and Mr. Gromyko, perhaps in Moscow. U.S. officials said before Mon-

day's session that they expected a "positive" result from the Geneva

Despite wide differences between the two sides, the two men appeared in good humor after more than three hours of talks at their first session. The morning round lasted an hour longer than antici-

Before resuming talks after lunch, Mr. Shultz and Mr. Gromyko were animated and jovial before photographers in the conference room at the U.S. Mission to the European headquarters of the United Nations, where the talks

Mr. Gromyko smiled and waved to reporters. He was greeted by Arthur A. Hartman, the U.S. ambassador to the Soviet Union, and by a former arms negotiator. Paul H. Nitze, who is in Geneva as a pecial adviser to Mr. Shultz.

Inside the conference room, Mr. Shultz and Mr. Gromyko laughed as they shared a joke about Soviet and American styles of note-tak-

U.S. Trade Delegation In Moscow for Talks

By Celestine Bohlen

Washington Post Service MOSCOW - A U.S. delegation headed by Undersecretary of Com-

merce Lionel H. Olmer arrived here Monday for the first round of official talks on U.S.-Soviet trade since

Meetings of the U.S.-Soviet working group on trade and economic cooperation were suspended five years ago after the Soviet intervention in Alghanistan.

Since then, U.S.-Soviet trade has fallen from a peak of \$4.4 billion in 1979 to \$2.9 billion in 1984. The low point was reached in 1980, during the embargo on U.S. grain sales to the Soviet Union, when trade between the two countries totaled \$1.9 billion

The talks between Mr. Olmer and his Soviet counterpart, Deputy

Foreign Trade Minister Vladimir

Dwayne Andreas, chairman of

U.S.S.R. Trade and Economic Council, a business group.

The Soviet Union's major complaint has been with political decisions in Washington that have ci-

ther halted or restricted trade. The talks this week are not expected to produce any change in rules regulating East-West trade, particularly in areas of technology regarded as strategic by the U.S. government.

In the last month, Soviet officials have directed several messages at the U.S. business community urging better economic relations. One such message was delivered by Konstantin U. Chernenko, the Soviet leader, in a meeting last month with Armand Hammer, chairman of Occidental Petroleum, one of the Soviet Union's leading trading partners in the United States.

N. Sushlov, are expected to focus was also in Moscow last month and was received by the Soviet prime minister, Nikolai A. Tikhonov, and Mikhail S. Gorbachov, secondranking member of the Communist

New York. "The rights of society have been impinged upon, and what they're saying is they're fed up. I'm fed up, too." A caller named Billy, from Brooklyn, said he knew why a seemingly ordinary man would carry an unregistered pistol

> "I feel frustrated like he did," said Billy, who called in this weekend to the Bob Grant Show on WABC radio.

In Chicago, Wendy said she feared the anarchy that could result if hundreds of people imitated Mr. Goetz. But she told Catharine Catalane, the host of a Sunday afternoon talk show on WGN. "He's an example that we are all being taken to an edge of anger, fear and frustration. Parents and communities have been shoved up against an emotional wall without any alternatives." Telephone lines to the stations had been jammed with

callers, the majority applauding Mr. Goetz or sympathized with his position. But the volume of calls, or that 90 percent

(Continued on Page 2, Col. 5)

By Joseph Fitchett

International Herold Tribune
PARIS — The special French nvoy to New Caledonia proposed Monday that a referendum be held to decide the future of the French territory. The referendum could bring independence to the islands

The referendum, intended to settle the conflict between native Melanesians and European settlers, would offer a choice between maintaining the status quo - a French territory with self-government only in local matters — and gaining in-dependence in association with France, which would handle defense, law and order and some other functions in the future state.

The plan was announced by Edgard Pisani, a former cabinet min-ister assigned by the French government to find a peace formula for the troubled Pacific nation. Its approval by the French National Assembly is considered certain.

date for the next round.

In a televised speech broadcast Noumea, the capital where most French policy in New Caledonia simultaneously in Paris and in of the white population lives, is the target of vehement criticism Noumea, the New Caledonian cap-ital, Mr. Pisani clearly indicated his support for the independence option in the referendum, scheduled for July 18. He said it offered the best compromise between the Mel-anesians' desire for independence and European settlers' wish to retain French protection.

If New Caledonian residents voted for the status quo, Melanesian extremists would then face a crackdown by French authorities,

Mr. Pisani said, however, that "change is unavoidable and irre-versible," and that independence could be reconciled with provisions to protect the rights of settlers.

Mr. Pisani said that, under his proposal, all land would be re-turned to the Melanesians, with provision for compensation and long-term leases for white families would be given special status under which the French community would have a voice in local affairs, Mr. Pisani said.

All arrangements would be guaranteed both by the new country's constitution and by the treaty of association with France. Details of both are still to be negotiated. The Melanesians can probably

carry the proposed referendum in favor of independence, French officials said privately. New Caledonia has a population of 150,000, in-cluding about 55,000 Melanesians. There are about 45,000 people of European extraction, and the rest

are largely Asian immigrants, many of whom could be expected to vote for independence. Mr. Pisani's proposals seem likely to lead to a transfer of sovereignty next year, followed by gradual moves toward full indeper for New Caledonia.

French policy in New Caledonia in France by conservative opposition politicians. They support the European settlers in New Caledonia, many of whom have been there for generations and oppose any form of independence.

But the French government, with

a parliamentary majority, strongly favors ending what many call a colonial situation. The Socialist government — which approved Mr. Pisani's plan in outline before it was unveiled - seems determined to proceed with the referendum despite rightist objections.

Melanesian nationalists, led by Jean-Marie Tjibaou, have criticized previous suggestions along the lines of Mr. Pisani's plan for making independence conditional on New Caledonia becoming an "associated state" linked to France.

But Mr. Tjibaou's movement, French officials said, was likely to

ting France to hand over sovereignty quickly. France's Socialists face legislative elections in 1986 in legislative elections in 1980 in which they could lose their parliamentary majority, and Melanesian separatists appear to have stepped up their agitation in recent weeks because of fears that they might face a more hostile conservative majority in France by next year.

Mr. Pisani's plan, which rejects Melanesian extremists' demands that only the indigenous population vote, is calculated to put pressure on all groups to compromise in order to end the impasse.

The crisis in New Caledonia erupted after local elections last Nov. 18. The elections were won by a white-dominated party opposed to independence. Most of the Melanesians boycotted the vote and have paralyzed life on the islands in their campaign for independence. European settlers have said that accept some version of the pro- any form of independence is liable keep military forces there.

General Salya said the guerrillas resisted the initial Victnamese push. About 5,000 guerril-

las were defending Ampil. Thai Army units were edging across the frontier, and more than 4,400 Thai civilians were evacuated from the area as stray shells landed across the border. Four Thai troops were wounded by shrapnel, Gener-

Ampil, 280 kilometers east of Bangkok, was the last major libera-tion front camp still intact following the start of Hanoi's latest dry season offensive, which began in

Vietnamese forces have overrun guerrilla bases at Nong Chan, Obok, Rithisen and Sok Sonh.

Khmer Rouge camps at Nam Yun and Chong Bok were taken Sunday after two days of resistance, according to a Thai official speaking Australia

by telephone from Ubon Raichathani province. Hanoi invaded Cambodia in late

1978 and drove Pol Pot's Khmer Rouge out of Phnom Penh on Jan.

A coalition of the Khmer Rouge, the Khmer People's National Liberation Front and followers of the former head of state. Prince Norodom Sihanouk, are battling Hanoi and the Heng Samrin regime that Vietnam had installed in Phnom Penh. They operate from a chain of about 20 bases just inside the Cambodian border and with the help of Chinese weaponry.

The Khmer Rouge fields more than 30,000 fighters, the liberation front about 12,000 and the Sihanoukists about 5.000. Western estimates say the Vietnamese have

about 160,000 troops in Cambodia. The guerrillas holding Ampil are not expected to fight to the last man, the liberation front leader, Son Sann, said Sunday. Unlike the Vietnamese, they have neither

long-range howitzers nor armor. The biggest weapon in the liberation front arsenal is the 82mm re-coilless rifle, which is a Chinese copy of a 1950s-vintage Soviet design. The defenders' hopes also rest on mortars, heavy machine guns and B-40 rocket-propelled grenades. Individual guerrillas were armed mostly with AK-47 assault

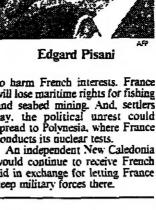

Two other liberation front border camps. Rithisen and Nong Chan, reported shelling by the Vietnamese on Monday. That officers speculated that it was carried out to prevent them from sending reinforcements to Ampil.

■ Protest in Australia About 300 Cambodians demon-

strated Monday at Parliament House in Canberra, calling on Australia to pressure Vietnam to withdraw its troops from Cambodia Agence France-Presse reported. The protesters were representatives of the Cambodian community in

Shultz, Gromyko Discuss

Weapons Control in Geneva

New York's Subway Shooting

Echoes Across United States

By James Gerstenzang

Las Angeles Times Service
WASHINGTON — Former Secretary of State Henry A. Kissinger and other foreign policy experts agree that the meetings between Secretary of State George P. Shultz and Foreign Minister Andrei A. Gromyko are unlikely in themselves to produce substantive arms control progress but could produce agreements to hold future talks.

I do not expect anything substantive to emerge from these two days of talks," Mr. Kissinger said Sunday, complaining that they had been the subject of news media

"hype."
"The best that can come out of these talks is a procedural agreement on how to conduct talks and toward what end," he said. "If that can be achieved, it would be con-

siderable progress."

Lawrence S. Eagleburger, a former Kissinger deputy and former undersecretary of state for political affairs in the Reagan administra-tion, said on an ABC News program that the progress of any negotiations stemming from the Geneva conference would hinge on the administration's willingness to com-

The question is going to be whether the administration is going to make the kinds of compromises as the negotiations go forward that are going to be necessary if they're going to keep the process going, and there I think the jury is still out." Mr. Eagleburger said. Noting that President Ronald

Reagan made it clear in a speech last Jan. 16 that he sought an improved relationship with the Soviet Gromyko in statements Sunday. Union, Mr. Eagleburger said there Mr. Gromyko said that he was was also a question of whether the Soviet Union is capable of making to ban space weapons and cut back the compromises that are necessary

the nuclear arsenal.

Mr. Shultz did not mention for an agreement." Mr. Reagan has refused to show space weapons and said that he had flexibility in the area of space no illusions about making rapid weaponry, central to Soviet conprogress in Geneva. cerns about the U.S. arsenal.

In Mr. Eagleburger's view, Mr. Reagan's adherence to plans to de-velop a space-based missile defense system, known in the administra- urms issues. They made clear that tion as the Strategic Defense Initiative, was a factor in bringing the Shultz and Mr. Gromyko would Russians back to even preliminary announce nothing more than meetings with the United States.

McGeorge Bundy, John F. Kennedy's national security adviser, said on the ABC program that as long as Mr. Reagan held to the space plan, "there will not be any

Under the Reagan plan, the gov-ernment would spend \$26 billion on research into a weapons system that would intercept enemy missiles targeted on the United States in space before they reach the earth's atmosphere. There are no plans, however, for actual deploymunist Chinese in 1945, making ment of a system, and a decision on such a step would be left to a future

> The composition of the U.S. delegation to Geneva reflects the scope of thought on arms control issues within the administration, prised some people. In San Diego, and Mr. Kissinger said that the administration's position has not

been made clear. Speaking on a CBS News program, the former secretary of state, publishes the monthly journal American Opinion.

Mr. Welch stepped down as the active leader of the organization in March 1983 and was named chair-

cated by the president."

Mr. Eagleburger said that resistance offered by Secretary of De-fense Caspar W. Weinberger and by Richard M. David Dave Dawson Show. "I think it's more of a humanitarian thing. It by Richard N. Perle, assistant sec- Idaho. It's the idea of people conretary of defense for international cerned with their own self-defense security policy, to previous arms and responding on a control efforts could cause "a lot of el by praising Goetz." difficulty." Mr. Perle was among those sent to Geneva with Mr. Show on radio station WRKO in

Now, however, Mr. Reagan is personally very clearly in favor of reaching sensible agreements on arms control, he said.

Boston generally have supported Mr. Goetz, according to the show's producer, Mike Coleman. But the blind praise that characterized the

Hawaii Telescope Tracks 'Beast' in Galaxy Center

Scientists Report Finding Evidence Of Object's High-Energy Particles

By Boyce Rensberger ngton Post Service

WASHINGTON - At the center of our galaxy, the Milky Way, sits a mysterious object, an elusive astronomical beast with exotic powers around which the entire galaxy revolves.

It cannot be seen with an ordinary telescope, because dust clouds swarms of intervening stars block the view, but it has long been known as a source of unusually strong radio signals.

Astronomers have been pursuing the beast for years in the hope of discovering something that might tems. Presumably, each of the 750 billion other galaxies in the known universe has a similar object at its

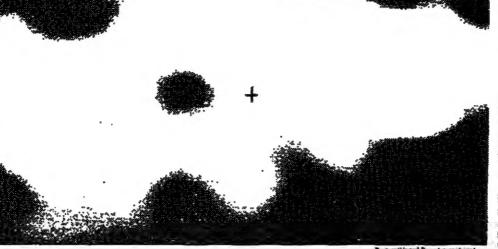

discovered evidence that the object, whatever it may be, is spewing vast quantities of energetic particles that collide with a surrounding ir-

"This rotating, lumpy doughnut provides strong evidence that something exotic is going on deep in the heart of the Milky Way. said Terry Jones, an astronomer at the University of Minnesota who, as a member of an international team, has been studying the phenomenon. Mr. Jones will present the team's findings at the American Astronomical Society's annual meeting this week in Tucson, Ari-

Despite the War, Brazil and Angola Enjoy Commercial, Cultural Boom

By James Brooke

LUANDA, Angola — About 2,000 Brazilian workers are to build Angola's largest bydroelectric dam under the terms of a \$500-million contract that has been signed here. But Angola's civil war is expect-

ed to delay ground breaking for the 500-megawatt dam that a Brazilian company, Norberto Oderbrecht, has contracted to build across the Cuanza River. The first turbine, imported from

the Soviet Union, is scheduled to begin operation in 1991. But antivernment guerrillas routinely kidnap foreigners, including Bra-zilians, and Oderbrecht is expected to wait for peace before sending 2,000 workers into the interior.

The dam contract highlights a surge in commercial and cultural exchanges between Marxist Angola and capitalist Brazil, a relationship that has been overshadowed in the last decade by the larger presence of Cuban troops and technicians.

CAIRO - Pope Shenudah 3d. the patriarch of Egypt's Coptic Orthodox Christians who was allowed to return to Cairo last week after 40 months in internal exile, led thousands of worshipers Sunday in a Christmas Eve Mass.

Men and women in the congregation wept as the patriarch led a procession of bishops and choirboys into the Church of Mary and Mark. President Hosni Mubarak lifted restrictions imposed on the

priest last Tuesday.
Pope Shenudah, in a crimson and gold robe, then climbed the steps to the altar to begin the ancient Coptic rituals. According to the calendar of the Coptic and other Eastern churches, Christmas Day falls on Jan. 7.

In his sermon, broadcast live over state radio during the four-hour service, the patriarch said: "On this occasion, all Copts open their hearts to their brothers, the Moslems. We feel that our brothers, the Moslems, are our flesh, our blood, our bones, in this beloved

The Coptic Orthodox Church is one of the oldest communities in Christendom. According to tradi-tion, it was founded in the first century A.D. by Saint Mark, one of the 12 apostles of Jesus. The church claims members in Egypt, the Unit-ed States, Australia, Canada, East Africa and South Asia.

Mr. Heidemann maintains that

Hitler Diaries Trial Puts Spotlight on Stern Publisher

By James M. Markham New York Times Service

HAMBURG — Under prodding by the judge, the four-month trial in the Hitler diaries fraud case has shifted away from the actual defendants, a disgraced reporter and a confessed forger, and onto a West German publishing concern and its flagship weekly, Stern magazine. On the witness stand the other

day, Gerd Schulte-Hillen, chairman of the board of the publishing giant Gruner & Jahr, was explaining how Stern had expected to the diaries. Mr. Schulte-Hillen said make a financial killing from the the reporter had refused and had sale of the diaries.

Suddenly, in an outburst that jolted the courtroom, Judge Hans-Ulrich Schroeder scolded the witness: "Stolen goods! Plunderers pull the books out of a plane wreck and you fence them."
The judge's sarcastic ire focused

on an event that, in fact, did not take place: the retrieval of Hitler's diaries from a plane that crashed in eastern Germany in 1945 as the Third Reich collapsed. Fabricated events and fictional people have lives of their own in the fraud trial.

But the outburst was symptomatic of a turn in the trial for Gruner & Jahr. The shift in emphasis, toward the role of the publishing company, is a tactical victory for Kurt Groenewold, the defense attorney for Konrad Kujau, a Stutt-gart dealer in Nazi memorabilia who has confessed to forging the 60

volumes in his own hand.

Mr. Groenewold, who made a name for himself in the 1970s by defending accused terrorists, contends that Stern's sloppiness in checking the authenticity of the di-aries and its failure to secure a proper copyright for them made the magazine virtually an accom-

plice in the fraud. "It's like a conspiracy;" the lawyer said during a pause in the trial. The thrust of his thesis has been that since Stern, wittingly or unwittingly, was implicated in the hoax, Mr. Kujau was merely an accessory. The attorney is said to be hop-

tor, conceded that Mr. Kujau had sold him "kilos of false Hitler writthat the strike would be "effectively over" if half the work force was on

Charter 77 Names New Spokesmen

VIENNA - Czechoslovakia's Charter 77 human rights group announced on its eighth anniversary Monday that it had appointed three new spokesmen for the next.

It said they were Jiri Dienstbier 47, a former journalist; Eva Kanturkova, 54, a writer, and Petruska: Susterova, 37, an office worker.

Mr. Dienstbier and Mrs. Susterova were questioned by police last. week with Vaclav Havel, a dramanist, and the outgoing spokesmen. Vaclav Benda, Jiri Ruml and Jana

Charter 77 was created on Jan. 7, 1977, with the publication of a manifesto in Western newspapers calling for respect of human rights in Czechoslovakia.

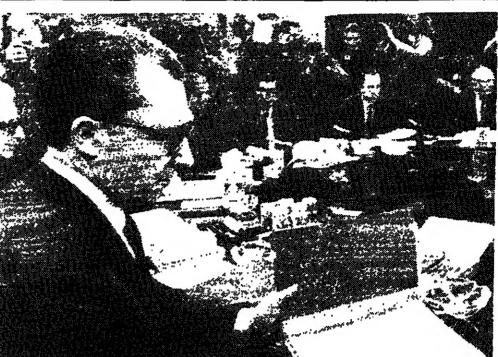

In a 17-page statement issued through emigres in Vienna on Monday and signed by the new spokesmen, Charter 77 reviewed its activities over the eight years since!

It reaffirmed that its aims included analyzing how the constitution and laws were observed, how human and civil rights were respected, and drawing attention to injustice.

In spite of the authorities' rejec-tion of the group and what it called the persecution of its signatories, Charter 77 lives, works and has gained respect both at home and abroad," the statement said.

Mr. Diensthier, now a night watchman, was jailed for three years on subversion charges in 1979 during a previous term as a Charter 77 spokesman. Five other signatories, including Mr. Havel who was sentenced to four-and-a-half years, were imprisoned at the same time

Mrs. Kanturkova served one year in prison in 1981 for subversion and Mrs. Susterova was jailed from 1970 to 1972 on similar.

Jacques Delors, left, at the first meeting of the new European Commission in Brussels.

Delors Is Installed as Head of EC

The Associated Press

BRUSSELS - A new administration at the 10-nation European Community, led by Jacques Delors of France, was installed Monday. Mr. Delors, 59, a former finance minister under President François

Mitterrand of France, met with the outgoing president of the EC Commission. Gaston Thorn of Luxembourg, before officially assuming

Andrews Silvers

Udg.

NEW YORK — It looks like a good year for John Lurie. True, he still lives on the Bowery, but have you seen the Bowery lately? Upward mobility and high-rises are replacing tenements and bums, and hi-tech bistros like Phebe's are the new joints. Which is where we find him.

Phebe's, corner of 4th Street — paneled walls, hung plants, vegetable-saiad couples at the tables; comrade-ly young men with clipped moustaches, backs and les who look like off-duty cops drinking beer at the bar. Wait a minute! They are off-duty cops.

One of them has just offered to buy Lurie, sitting at a window table, a drink. He had been reluctant to sit here: "I might be recognized." And sure enough here's this smiling off-duty cop waving at him. Why does he buy John Lurie a drink when he is in possession of certain, shall we say, personal information involving Lurie's stolen saxophone and a hypodermic needle?

Jose Ferrer Quits as Miami Theater Adviser United Press International

· : MIAMI - Actor Jose Ferrer ended his turbulent two-year stretch as artistic adviser for the Coconut Grove Theater in Miami by resigning abruptly Friday night, "Attendance and subscriptions have not increased, to put it kindly," Ferrer, 72, said.

Miami bank manager asks no questions when a suitcase of cash is dumped on his desk.

It looks like John Lurie's year. Last year wasn't too bad either. He played a highly visible supporting role (Nastassia Kinski's pimp) in Wim Wenders's "Paris, Texas," wrote the music (a string quartet between Bartok and Charlie Parker) for the film "Stranger Than Paradise," in which he also

stars and which many critics voted one of the 10 best of 1984. (It won the Golden Camera at last year's Cannes Festival.) His picture is currently large in quarter-page ads in the New York press ("A tour de force") and on Paris Métro posters. He plays a two-bit hustler named Willie who cheats at poker, eats TV dinners, reads the Racing Form and doesn't leave his sleazy Brooklyn crib except to go to the racetrack. He gets a visit from his cousin Eva

spend 10 days grunting at each other. It has been compared to a play by Samuel Beckett. Officially, the film is in black and white but it might better be described as gray. Lurie has a gray face, a Bowery loft face, it looks like you're seeing it through a fish-eye lens. It does not exactly spread into smiles. One French critic, going a bit far as the French will on such matters, called him

(Eszter Balint), who arrives from Hungary. They

the "Bogart of the '80s." It all started in 1980, when he formed a band called the Lounge Lizards. "It was kind of a fluke." He even

money was to record the soundtrack first and go get I know how to get the most out of the guys. I won't the money by talking the plot along with the music. allow them to play standard licks. I spend half my time Then someone asked us to play in a club and it became telling people not to sound like Coltrane. I might make this, well, thing."

The first record by the Lounge Lizards was produced by Teo Macero, Miles Davis's producer, and it sounded somewhere between free jazz and gloomy rock. They played Thelonious Monk's "Epistrophy" and "Well You Needn't" just as bad as any punk band. "We couldn't play at all at the beginning." Lurie

It's hard to decide whether the Lounge Lizards play azzy rock or rocky jazz but they were the first, even before Joe Jackson, to bring jazz to the young rock audience of the '80s, and Lurie tries in vain not to sound vain claiming responsibility for the current surprising popularity of hard boppers like Lee Morgan and Art Blakey in London and New York disco-

Back in a Worcester, Massachusetts, high school, he wrote "a silly adolescent novel," and began to play the harmonica "by accident" in Philadelphia, where he once sat in with bluesman John Lee Hooker. When he was 17 (he's 32 now), very late at night in a hazy New York club ("it's all rather hazy") some guy gave him an also saxophone.

"I'd rather be a dilettante actor than a dilettante musician," says Lurie with his fishy (Bogartian?) smile: "Music is more in my blood, even though I tend creepy. It also gets boring after awhile."

Doesn't matter at this point. Off-duty cops protected talks gray: "I was writing music for a movie I wanted to lose my pitch relationship if I don't play for six to make and then I thought the best way to raise the weeks. My biggest talent is probably as a band leader. a good film director."

The Lounge Lizards climbed out of the underground last year and completed a successful monthlong tour of Europe with three SRO nights in Paris's prime jazz club, the New Morning: "We've learned how to play now. On-the-job training." Lurie also taught himself how to notate music doing the score for Stranger Than Paradise." The band is currently in a New York studio recording their next album, "Mutiny on the Bowery."

When that's finished, Lurie will leave for Europe and points east to play more than a minor role in Wim Wenders's next film, and by summer should be before cameras in Nigeria playing the part of a rocker com-peting for a woman with African pop music superstar

King Sonny Ade.

He has just given up "a lot of bad habits. Heroin is out of control here. Know what I mean? It's in the environment, like Pavlov's dog. If you're going to make a living playing music you also have to go through all this business stuff, and you're still thinking about it when you go on stage. Heroin used to make the magical thing happen quicker. Now it doesn't. I quit because the dealers are getting too creepy, even when they're friends of mine. The whole scene is

...now, what about a Happy New Year?"

If you and your business turned in a profitable performance during 1984, congratulations. These days, that's no easy task. And now is the best time to lay the groundwork for another good year. Start with a personal computer from IBM.

There is certainly one member of our growing family of personal computer products just

right for you. There's the original IBM Personal Computer, a tool for modern times in thousands of small businesses around the world. Or the PC XT, a more powerful, versatile machine.

If your business keeps you on the move, consider the Portable PC. It lets you take your personal computing power with you - wherever in the world you go. And for fast-growing companies that need a powerful, expandable machine, we offer the Personal Computer AT, the PC with up to 42 megabytes of storage.

If 1984 wasn't as brilliant as it might have been, you probably need extra help this year. Help that an IBM personal computer can provide. With hundreds of programs to choose from, it will let you organise, analyse, and use

your information with amazing speed and ease. And leave you free to concentrate on the more important aspects of your business.

Make a new year's resolution to visit an IBM Authorised Dealer or Retail Centre as soon as possible. Because if you start 1985 off on the right foot, chances are you'll end up ahead next December.

Employed vs. Unemployed

France has just experienced an event symptomatic of much that is wrong with Europe's economy. No country can prosper unless its response to changing industrial technology is prompt. It had therefore seemed encouraging to find France - not noted recently for economic flexibility - on the verge of agreement between management and the non-Communist labor unions to lessen its industrial sclerosis.

The agreement in sight still left many differences between workers, who seek job security, and employers, who seek greater freedom to hire and fire. It left largely intact the system whereby employers need government approval before they can reduce employment, which makes them less dynamic and can be embarrassing for the authorities. But by making it a bit easier to lay off workers in bad times, it increased the probability that employers would recruit new

workers when things looked better.

The agreement has been thrown out by the rank and file. This leaves their non-Communist leaders looking uncomfortable and the Communists, for the first time in years, looking clever. More important, the economy remains as inflexible as ever.

The net result is that the unemployed will still find it very difficult to get jobs. What employer is going to risk increasing his labor force, at a time when sales are uncertain, if he cannot count on being able to reduce it if his initial decision proves unwise? The costs of having to hang on to under-occupied workers, paying wages plus the additional social security charges that fall heavily on

the employer, are high. There is a point at which job security for the employed can mean no new jobs for those without them.

Workers' representatives claim that they are only preventing the predatory employer from beating wages down and ignoring unemployment's heavy social cost. But the truth is that they are defending the employed workers at the cost of those - usually young, female, immigrant or all three who have not got a job and may never have one unless the system changes.

This is not a problem to be solved by wholesale abandonment of the social standards progressively grafted onto labor mar-kets since the early 19th century. But there is room to break down some of the restrictive, essentially selfish labor practices of today, because they are based on a misconception about the economic process.

It is fallacious to suppose that at any given time there is only a given number of jobs to be held. Even in the short run, employers have some choice between paying for more workers or for more machinery to help existing workers produce more. And in the longer run the room for choice grows hugely.

When organized labor refuses to make present working conditions more flexible whether in respect of recruitment and separation practices or of wage differentials between different kinds of employment - it is simply tilting the balance away from more jobs and toward more machinery. That is why the news from France, symptomatic of a European fallacy, was bad.

INTERNATIONAL HERALD TRIBUNE.

Into Norwegian Airspace

A Soviet submarine operating in the Barents Sea fired a cruise missile through Norwegian airspace into Finland's northern bleakness on Dec. 28. Officials in Washington and Oslo report that it probably was a stray, apparently unarmed, fired by accident during an exercise. One hopes so, although the thought of an accidental firing is not exactly comforting.

It would have been reassuring, in any event, if the Soviets had made the first report of the shot and had apologized prompily. As the downing of the South Korean airliner in September 1983 indicated, the Kremlin gets awfully urgent and tight when Soviet airspace is innocently violated. Its concern for the tenderness of borders has a certain one-way quality.

But let us examine another thesis: Suppose it was not simply a test shot that flew off course, but a shot fired, or used, for a reason: to assert a Soviet claim to the operative sovereignty of the northern region lying near the Soviets' sensitive Kola Peninsula bases; or to lean on Norway, which has been the object of a nasty Soviet political campaign designed to thin its working ties with its NATO partners.

The Soviets can have no worries about neighboring Finland, an independent and neutral country made permanently deferential by defeat in war and then by treaty - to their

repeatedly penetrated the airspace, waters and the actual soil of neutral and unoffending Sweden: military preparation and political

bullying are the apparent purposes.
In Norway the Soviets have been doing their best to cultivate nuclear jitters by claiming that the Reagan administration seeks to make it a 'springboard" for nuclear attack on the Soviet Union. They urge Norway, which has long had a policy of barring foreign troops and nuclear weapons in peacetime, to restrict further its participation in NATO affairs. As recently as Nov. 27, Moscow alleged that Washington was considering deploying in Norway "cruise mis-siles with conventional warheads, which can be re-equipped with nuclear charges" - the kind of weapon a Soviet ship apparently let 'ly over Norway a few days later.

Throughout Scandinavia there is a disinclination to make a dark reading of this latest incident. The Firms noted only the passage of a "flying object," and they express doubt that it can be found. The Norwegians waited to report it until everybody was back from holi-day. It is, at most, a small affair, but it briefly lights up a northern landscape shrouded in

more than one kind of winter darkness. -THE WASHINGTON POST.

The Koreans Need to Sell

are striking. Yet if you ask one of the bright, aggressive Korean technocrats if their economy is another Japan in the making, he flinches. These American-educated economists, business administrators and engineers, who have been given enormous policymaking power, are justifiably proud of their record. But they know that the future depends on continuing access to markets and technology from more developed countries. If America should come to view this nascent economic giant as a com-

petitor, both countries will be the losers. Like Japan, South Korea emerged from war with little intact capital. Like Japan, it lacks a resource base, possessing no oil and little arable land, and it is seriously overpopulated. But, also like Japan, South Korea has built a thriving economy on hard work, a high savings rate and exports to richer nations.

In 1964, per-capita income was about \$100. Today it is \$2.000. An agricultural backwater has become an industrial state efficiently producing goods from T-shirts to offshore oil rigs. But it is still far from wealthy; Americans earn six times as much. And planners worry that Korean achievements will be throttled by unwise protectionists in the richer nations.

Successful industrialization means climbing up a ladder of increasingly sophisticated organization and technology. South Korea hegan at the bottom, specializing in simple, laborintensive products like shoes, toys and cloth-ing. By the mid-'70s it had reached middle-tech rungs like shipbuilding, steel and engines, using foreign-made equipment and licensed technology. Most of these industrial projects have paid off, with low manufacturing costs relative to foreign competitors. But costs do not matter if no one will buy the output, or if the projects do not provide the expertise to move up the ladder. As this "new Japan" starts competing with mature industries abroad, it starts feeling the protectionist response.

Last fall South Korean producers of color television sets were hit with whopping "countervailing duties" by the U.S. Department of Commerce. Only last month, steel makers were forced to cut back exports to America under threat of formal quotas. Most ominous, Japanese manufacturers have virtually shut off the flow of technology that could be used to

make up-to-date electronic equipment. All this frustrates South Korea, and should frustrate anyone concerned with world economic development. America, Japan and Europe have much to gain and little to lose from South Korea's continuing success. Consumers will gain high-quality and low-cost goods and in the process create a market in South Korea for the hundreds of products and services in which advanced economies will retain a competitive edge. Jobs lost would be few

compared to jobs created by trade growth. But South Korea may never achieve the dignity of economic maturity and its trading partners may never reap the benefits - not if protectionists in America, Japan and Europe are allowed to stand in the way.

-THE NEW YORK TIMES.

FROM OUR JAN. 8 PAGES, 75 AND 50 YEARS AGO

1910: Austria Plans New Naval Base PARIS - The news of the intention of Austria to create a second naval base in the Adriatic at Sebenico has created considerable sensation. That this news was unwelcome to the Vienna Cabinet is proved by the fact that it sent out a hesitating denial. This was, however, couched in such ambiguous terms that it more resembled a confirmation than a contradiction. There is, therefore, a general movement eastward of Austria's naval and military power. From Sebenico the fleet of the Dual Monarchy has easy access to the Mediterranean and the coast of Italy from Venice to Brindisi. The Austrian fleet is regarded as practically the

Mediterranean division of the German navy.

1935: Italy and France Sign Accords ROME — Premier Mussolini and M. Pierre Laval signed accords [on Jan. 7] concluded during the French Foreign Minister's visit. Smiling and shaking hands before a crowd of journalists, they posed for the cinema record of Franco-Italian rapprochement, after 15 years of tension. It was believed they signed an agreement to consult each other in case of any menace to the independence of Austria; conventions on the status of Italians in Tunisia and on territorial concessions made by France in southern Libya and in French Somaliland; a protocol to consider German rearmament ille gal so long as a special accord is not reached between Germany and the powers.

Where Fear and Dithering Kill

By Ralph Diaz

PIRE DAWA, Ethiopia — I feel ashamed now, remembering that when I first saw death among the children lying on the cold earth, I did not want to be affected by it. I held my breath, lest I, too, inhale death. Close by, I noticed that others, much stronger than I, touched and even smiled at death. "See," one of them seemed to say to me, "I can touch death, and life takes on more vigor in me to bring life to others."

Me? I was afraid to touch those small skeleton

hands. I leared that the reverse process would take place, that death would flow into life. All my knowledge of human development was use-iess at that moment when I faced death. There I was, standing, unable to move, wanting to go away, to wake up in a different reality, in Geneva or Nairobi or some other place far from death and the clutch of fear.

So my mind started to rationalize. "What can you do anyway? You are just one person representing one organization. It has strifted 30,000 tons of wheat flour to a storage place nearby. Then what? It's too late for most of the children, isn't it?"

The child nearby closed her eyes for the last time

with a smile on her lips, still holding the hands of the lady who dared to dely death. The lady had managed to give something very precious to the child who had just died: "You are dying as a person." she had told her, "and not as an animal."

Moisture gathered in my eyes. The lady faced me. She read my thoughts. You are wrong. Not everyone is near death here. The force of life is unbelievably strong in persons. With your help, many more children. their mothers and others can be saved." Why had I not realized it before? First fear, then rationalization: These are both instruments of death. I must break away from them. I must send a Telex to the world.

Let us do something now with our African brothers and sisters. Together let us form a life bridge. Let us reverse death's harvest. There is still a little time left for many children to be fully restored to life. Are you afraid? Then you, too, will be an instrument of death.
Will you act now? Then you, too, can be a force of life.

More Progress Is Needed To Avert Accidental War

By Paul Bracken

This is the first of two articles.

N EW HAVEN. Connecticut — In thinking about preventing a auclear war, more emphasis should be given to arms control measures that contribute to crisis stability. Actions that allow each side to maintain political control over its own nuclear forces, measures that enable each to understand the significance of dangerous operations, and systems that help to terminate a breakdown of deterrence all need more attention than they have received to date.

Steps have been taken in this direction, but more can be done on this underside of arms control.

Significant advances have gone largely unnoticed. Attention may center on summit-level arms agree-ments, but initiatives by the U.S. De-

friends are often formalized by some

partment of Defense, and apparently by the Soviet Ministry of Defense, to drive the probability of accidental nuclear war down to zero are one of the paramount arms control achieve-

ments of the nuclear age.

Today the chance that a flock of Canada geese crossing a radar screen could start a nuclear war is effectively nonexistent. Scare stories to the contrary, in peacetime there is no danger of an accidental nuclear war. The current situation was not auto-

matic, for in the early days of nuclear weapons the danger of accidental war was considerable. Yet through large investments in hardware and careful organization of nuclear forces we have managed this matter well.

The problem we now face can be

described as one of contingent dan-ger. For the success of managing the problem of accidental nuclear war in peacetime contrasts with the difficulty of doing so in a crisis.

The differences are considerable, for in a crisis the expectation of at-

tack increases, and many of the peacetime controls that prevent accidental war are removed when strategic and theater forces go on alert. Also, in a political crisis the danger of inadvertent war arises, a war resulting from escalation in which each side keeps escalating over the other until an unintended "cruption."

cation of various types.

There is a need for receptivity to new ideas and a disposition to reas-sess policies on which consensus may As long as things remain peaceful, reliance on the current state of affairs prove unattainable, before they be-come irreversible. There is need, will work well enough. That is, if the two powers can avoid direct confron-tations, then the initiating trigger whenever possible, for the two sides needed to precipitate an accidental or Beyond that, it would take a coninadvertent war in a crisis does not siderable mental effort and readjustoccur, and war will be avoided bement in traditional modes of thinking to embrace the innovative concept of cause conflict by accident in peacetime has been eliminated as a serious problem. Two policy approaches follished - in the words of the Palme low from this observation.

First, it may be best to concentrate and security issues — "not against the adversary but together with him." energy on preventing confrontations, by diplomacy, wise foreign policy and the fostering of a cooperative The current negotiating process af-fects the fate of the entire world. The U.S.-Soviet relationship. This was the two powers on whose shoulders hisrationale for the policy of detente tory has placed such a heavy responfollowed by America in the 1970s. sibility ought to listen to other world

The second approach is to reach into the structure of the problem itself: establish rules so that if an intense crisis involving high nuclear alerts occurred, or if deterrence actually failed, an eruption to large nuclear war would be rendered less likely.

This is not easy. A balance has to be struck between the twin dangers of accidents, which lead to a loss of control, and overly cautious actions, which could compound the security problem. But the obstacles may be no greater than those involved in restoring a cooperative relationship.

The writer, a Soviet citizen, is a former senior official of the United Nations and now a fellow of the UN The writer is an associate professor in the School of Organization and Manage-ment at Yale University. He contributed

East-West Therapy: The More Contacts the Better By Evgeny M. Chossudovsky

GENEVA — When East-West ne-gotiators sit down together, the world awaits more than patchy milicannot deal with each other in a mutary compromise. And when agree-ments result, three questions arise; Will they lead to a significant at-tenuation of the nuclear arms race, in tually profitable way. In 1972 they asserted in an "agreement on basic principles of relations" that differences in ideology and social systems are not obstacles to normal relations.

quantity and quality?
Will they bring about an appreciable reduction of East-West tensions? We know that for various reasons Are they likely to be the first in a series of agreements that will ultimately — at least during the lifetime of our children — lead to the total

extirpation of nuclear weapons? In fact, of course, no negotiation on a rearrangement of vital national security interests between the two present adversaries can be dissociat-ed from the psycho-political context.

A study has just been published by the UN Institute for Disarmament Research entitled "Assumptions and Perceptions in Disarmament," by Professor Daniel Frei of the University of Zurich. The study aims at identifying "views and expectations held by Soviet and U.S. governments about each other, with special reference to assumptions regarding the sensitive field of security."

The study is based both on openly accessible source material and on interviews with senior officials in Moscow and Washington. Mr. Frei found that the "fundamental incompatibility between the Soviet and American views must be taken seriously to the extent that it reflects a real conflict of interest and world outlook."

Mr. Frei cautions against attempts to put Soviet-American negotiations on the right track "by wishful thinking such as pleading for overcoming 'misperceptions' and learning to per-ceive each other 'realistically' in order to establish harmony."

But this does not mean that the

N EW YORK — A year ago Dec. 31, democracy was over-thrown in Nigeria. The coup and

the experience of a year of military

rule raise difficult questions about the very real limitations of demo-

cracy in developing countries. Nigeria had been a leader on a

continent generally lacking demo-cratic freedoms and human rights.

In 1979 the armed forces handed

over to an elected government. Great effort had been given to de-

signing a constitution providing

representative government in a

country of complex diversity. Shehu Shagari assumed power at a time when oil carnings, some 90

percent of Nigeria's revenues, were at their peak. Money flowed in for

huge and often ill-conceived pro-jects. The agricultural base had long been neglected, necessitating the importation of billions of dol-

lars worth of food. Federal and

state agencies were punch-drunk with revenues. Official and busi-

nessman scrambled for a share. Then came the oil glut of 1981. Within months, Nigeria's earnings

were halved and the government

introduced its first austerity bud-

get. But the people's expectations continued unabated, as did the

costs of the bureaucracy.

-to remove its missiles from Europe

proposal for nuclear defense.

How Weapons in Space

Promote Arms Control

By Charles Krauthammer

at least as much in transition today as

a year ago. Yet one thing is new. Mr.

Reagan has nurned "star wars" from

an idea into a \$26-billion program.

The Soviets are desperate to stop it.
The puzzle of the day is: Why?

Study after study shows that the president's dream of a defense that ren-

ders nuclear weapons, "impotent and

obsolete" is a fantasy. Why are the

Soviets afraid? So afraid that they

reversed field, swallowed pride and

conditions and returned to Geneva.

What do they know that we don't? They know that for a nuclear de-

fense to "work" can mean two things.

Many of President Reagan's critics

(and supporters) have been so mes-

merized by his vision of a nuclear-

free world that they have overlooked

In his March 1983 speech, Mr.

Reagan sold "star wars" as a cure for

deterrence. He still sells it the same

way. Only the other day he said again

that any defense that rests on the

threat to kill millions of people (i.e., deterrence) is immoral. He wants an

American defense to rest instead on a

Nigeria: A Year Without Democracy

By Peter V.D. Emerson and Joey Shawcross

predictably cited mismanagement

and corruption. To its credit, the new regime can claim success in

tackling some of the more pressing

problems. Harsh austerity mea-

sures have improved the economy but have yet to aid the average

person. Corruption has been less-ened, although hardly eliminated. In daily life, greater order has been obtained with the help of a

sententious media campaign called "War Against Indiscipline." Severe

decrees have promoted economic

stability in a way that would not

have been politically feasible under a democratic government.

The regime also has a sinister side. The freest press on the conti-

nent has been muzzled, and almost

the entire "political" class has been imprisoned. Detentions and trials

in camera continue. Laws enacted

by decree have brought an erosion

of personal freedoms not seen un-

der previous military regimes. In retrospect, there seems to be

something inevitable about the

coup. A complex democratic sys-tem could not provide a national

consensus and probably could not have commanded the self-sacrifice

necessary in these less affluent

times. The military has enforced

order where democracy could not

one of those meaning

coup with glee. Now the harder truths are sinking in. Sooner or lat-

er, and probably sooner, they will

take enough account of Nigeria's fragmented society and lack of co-

There has been talk in Lagos re-cently of an interim "diarchy" be-tween the military and civilian rep-

resentatives, leading gradually to a democratic system better tailored to Nigeria's circumstances. Cer-

tainly even in the short run the military would command greater credibility if it abandoned some of

its harsher tactics and regulations.

Although the military has indi-cated that it is in no rush to hand

back power, there can be little doubt that after the recent vibrant

round of democracy Nigerians will

not be satisfied with prolonged military rule. Nigeria's military rulers

have a heritage and a responsibility they should not disdain.

Mr. Shawcross, a public relations consultant, worked for several years in Nigeria. Mr. Emerson is a political

consultant with an interest in Africa.

They contributed this comment to

The New York Times.

The democratic constitution was

entially an import. It did not

again tire of military rule.

their horror of deterrence - but a dent - we must think of something other than population defense.

The reasons are simple. Such a de-fense must be unimaginably perfect. (A system 99-percent effective allows 100 bombs through.) Offensive countermeasures are easy and cheap. And - the clincher - the most perfect "star wars" defense does absolutely nothing to stop bombs delivered by cruise missile or bomber. A defense meant to protect popu-

lations will not work. But "star wars" can work in a second way, a way that holds little appeal for American citizens - hence Mr. Reagan's silence on the subject - but great interest for Soviet strategists: It could protect weapons. A "star wars" system only partially effective could protect America's retaliatory (second-strike) capacity, because to retaliate effec-tively, only a fraction of one side's s need survive.

The Soviets are frantic about this prospect because they have invested hundreds of billions of dollars in a huge first-strike force of SS-17s, -18s and -19s. An imperfect "star wars" designed to defend weapons, in effect and unilaterally, thins this force. It closes what Ronald Reagan once called the window of vulnerability. It is arms control by American diktar

Faced with a challenge to the most important and most threatening element of their nuclear arsenal, the

Soviets have two choices.

One is to compete, Adapting an offense to defeat a city defense is easy; you only have to get, say, 10 percent of your warheads through But to defeat a defense of missile fields, a very high percentage of war-heads has to get through. A study commissioned by Congress's Office of Technology Assessment estimates that overwhelming such a defense

Letters intended for publication should be addressed "Letters to the Editor" and must contain the writer's signature, name and full address. Letters should be brief and arc subject to editing. We cannot be responsible for the return of

unsolicited manuscrinis.

could take 100 times the effort needed against a city defense. Maintaining a potential for a disarming first strike thus becomes exceedingly difficult and impossibly expensive.

The other Soviet alternative is to regotiate. Hence Geneva. Far from being a threat to arms control, "star wars," by offering a unilateral American alternative, is an

inducement. It has already coaxed Andrei Gromyko to Geneva and Mr. Gorbachov to declare that his side is willing to negotiate radical reduc-tions in offensive arms - once "star wars" is dealt with, of course,

LETTERS

Babies Aren't the Cause Regarding the editorial "Babies for More Famine" (Dec. 31):

In this editorial the twisted logic of the so-called Malthusian doctrine of population increase is succinctly set out: People who do not limit the size of their families deserve to watch their children die. But the sad fact is that women in countries like Ethiopia that are torn by a vicious scramble for political power have "more children than they ought" because the chances of those children to survive to adulthood are to feetle. to adulthood are so fragile. Abortion is not the answer, nor is death by starvation. The children are not the cause of the problem, nor will limit-

ing their numbers solve it. DORIE BAKER.

The editorial argues that if America stops funding the International Planned Parenthood Federation, mostly death, then, will go on regulating family size in the world's poor countries. The writer might have considered whether abortion is not itself a form of death, in particular when carried out to cope with famine.

JEAN-BAPTISTE GERARD.

FUTURES AND OPTIONS

Brokers Bemoan Collapse Of NYSE-Comex Merger

By H.J. MAIDENBERG

New York Times Service EW YORK -- When the New York Futures Exchange and the Commodity Exchange said Friday that year-long merger negotiations had been ended, none were as saddened as those in the brokerage community. For many years, brokers have said that unifying New York's five futures markets would lead to increased efficiency.

The proposed Comex-NYFE merger was seen as a major step in that direction. So was a tentative decision a decade ago by four of the five exchanges to share common quarters at the World Trade Center in lower Manhattan, But that agreement fell apart for the same reasons that broke up the Comex-NYFE courtship. The reasons are the wide gulf between the values of exchange

seats, the vastly different markets they serve and, perhaps most important, the refusal of exchange officials to give up their jobs or accept lesser posi-

of seats and exchange officials' reluctance "Aside from the human and financial obstacles to consolidoomed combination. dation, the New York ex-

Differences in value

changes would first have to adopt common processing of their order flow and then common clearing," said Thomas A. Russo, partner in the Wall Street law firm of Cadwalader, Wickersham & Taft and a leading authority

A step toward common processing of orders took place last summer, when the Comex, the third-largest futures exchange, began handling the tallying of the buy-sell orders and related paperwork for the much smaller New York Cotton Exchange. The other New York futures markets are the Mercantile and the Coffee, Sugar & Cocoa exchanges.

But clearing work is much more difficult to consolidate, Mr. Russo said last Friday. The main tasks of clearinghouses are to debit and credit the positions of exchange members at the end of every business day and to set margins and monitor position limits

HE clearinghouse is not interested in the gains or losses of a particular trader; it is the broker-member of an exchange that is responsible for making good on every trade. But the clearinghouse does monitor the members in a system intended to guarantee that every contract will be honored.

"Although the system has worked superbly over the years, the fact is that no two clearinghouses operate the same way," Mr. Russo said. "Each has different accounting procedures, capital requirements, and so forth. Some are separate corporate entities; others are divisions or subsidiaries of exchanges.

Another hurdle toward common clearing, he pointed out, was the fear that it would create an excessively powerful authority that might attract additional attention to an industry that has always been terrified of regulation.

The exchanges that trade options based on futures decided early to adopt common clearing, and this is done by Options Clearing Corp., based in Chicago, which has been held up as a model for the futures exchanges.

But John J. Conheeny, chairman of Merrill Lynch Futures, the biggest broker in the industry, said: "Of course, we brokers would appreciate any move to reduce our paperwork and the complexity of dealing with different clearing procedures. But in fairness, the futures options markets are only a few years old and all operate more or less the same way, while those of the older markets evolved to serve the needs of New York's widely diverse commodity markets.

on clearing will have to come some day," he add "but I don't know when."

Dollar Advances; **Gold Falls**

Pound, Franc Hit New Lows

LONDON - The U.S. dollar on Monday surged to record highs against the British pound and French franc while advancing against all major currencies in European trading.

The dollar also reached its highest level against the Japanese yen in more than two years.

The price of gold, meanwhile, fell below \$300 a troy ounce for just the third time in two and a half years, and silver's price dropped below \$6 a proy ounce.

In London, the pound slumped to \$1.1403 from \$1.1540 late Friday. Sterling hit a trading low of \$1.1385 Wednesday but managed to close that day at \$1.1485. In Paris, the dollar climbed to

record 9.7215 francs from 9.6775 francs late Friday, eclipsing the previous record of 9.7175 francs set

Wednesday.

The dollar is being supported by expectations of continued low U.S. inflation and by suggestions that U.S. lending charges might have bottomed out after recent declines.

Dealers said Friday's report that the U.S. money supply jumped \$6.7 billion fueled speculation among some currency traders that U.S. in-terest rates could be headed higher. That would increase yields on investments denominated in dollars. The British pound is under pres-

sure from prospects that worldwide oil prices will continue to slide, eroding Britain's revenue from its North Sea oil holdings.

The pound was further undercut by published reports that Prime Minister Margaret Thatcher's government had decided against defending the pound even if it slips toward parity, or a one-to-one ex-change rate, against the dollar.

The dollar began its trading day in Tokyo by rising to 254.60 Japa-nese yen from 252.55 yen late Friday. It was the first time the dollar had risen above 254 yen since November 1982.

Other dollar rates in late Europe-an trading compared with late Fri-day were: 3.1780 Deutsche marks, up from 3.1630; 2.6435 Swiss francs, up from 2.6220; 3.5905

Gold prices continued to fall under the weight of the strong dollar and moderate U.S. inflation. Gold, which dipped briefly be-

low \$300 an ounce in London trading Friday for the first time since the summer of 1982, was quoted in London on Monday at \$296.25 an ounce, down from \$303.50 late Fri-

in Zurich, gold fell to \$298 from \$303,50 late Friday. Earlier in Hong Kong, gold slipped to \$297,30 an ounce from \$299.14 at Saturday's close.

Michael Clark of IBM with his secretary at a computer terminal at his Beijing office.

U.S. Computer Companies Struggle To Interface With Chinese Market

By John F. Burns New York Times Service

BEIJING - From the days of Marco Polo, when a journey to Beijing took months, it has never been easy for Westerners to do business with the

For U.S. computer companies hoping to exploit the country's new "open door" policy, it is still one of the most difficult markets to penetrate, requiring special reserves of patience - and money

IBM China Inc. is typical of dozens of U.S. concerns that have opened offices here since the establishment of diplomatic relations in 1978. The company is expanding rapidly, with its entire expatriate staff housed in expensive hotels, as the Chinese authorities have generally refused to accompany modate businessmen in the special compounds where diplomats and foreign journalists live.

The situation strikes many Western executives as anomalous, in light of Deng Xiaoping's emphasis on the need for rapid growth in foreign invest-ment and trade. But IBM — which now holds about 70 hotel rooms in Beijing as offices and

 is pressing on with its own housing plans.
 The company plans to import U.S. prefabricated townhouses, and hire a Chinese concern to erect the houses and two apartment blocks on a parcel of land in Beijing's northwestern suburbs. Ultimately, the site will accommodate upwards of 100 people, including families, who will most likely live compound-style, with Chinese armed police at the

gates, as do most foreigners here. In his office on the sixth floor of Beijing's new Great Wall Hotel, with a panorama of the Forbid-den City visible through the picture window, Michael Clark, IBM's country manager, described other problems connected with doing business here. One of the most vexing is the bottlenecks clogging the Chinese transportation network. Imports can sit for weeks waiting to be cleared for forward shipment to China's major cities. As a result, IBM has adopted the costly expedient of chartering aircraft to carry its computers in.

Once here, distribution presents fresh problems.

China has few of the specialized vehicles used in (Continued on Page 9, Col. 1)

Shamrock Corp. Agrees to Merge With Occidental

The Associated Press

LOS ANGELES - Diamond Shamrock Corp. has agreed in principal to be merged into Occidental Petroleum Corp. in a tax-free ex-change of stock worth about \$3 billion, executives of the two oil companies announced Monday.

The combination would create the nation's seventh largest oil company in terms of sales and the ninth largest in assets. Directors of each company were meeting late Monday to consider the management-approved merger.

The announcement came just three days after the Los Angeles-based Occidental and Dallas-based Diamond Shamrock said they were discussing a possible business com-

However, sources close to both companies, who asked not to be identified, indicated that talks began about a year ago, broke off temporarily, then recently were re-

The proposed merger calls for the common stock of both compa-nies to be exchanged on a one-forone basis for shares of a new holding company to be formed by Occidental. The new company would be incorporated in Dela-

Occidental shares slumped \$1.371/2 to \$23.621/2 a share and Diamond Shamrock was off 871/2 cents at \$20,121/2 as the most active issue on the New York Stock Exchange Monday.

At current prices for Occidental stock and with approximately 126.5 million shares of Diamond Shamrock stock outstanding, the deal would be worth \$2.99 billion.

Preferred shares of both companies also would be converted into preferred stock in the new compa-

Crocker National Corp., would post a 1984 loss of \$324 million. Analysts, noting that the company now appears vulnerable to takeover, expect Midland to post pretax earnings for 1984 of £90 million (\$103 million), down sharply from 1983's pre-tax profit of £225 million.

Midland Shares

Rise on Rumors

LONDON — Speculation that any of three companies may bid to acquire Midland Bank PLC pushed the company's shares higher in trading Monday on the London Stock

Exchange.
Midland shares rose 15 pence

a share from Friday's close, to 353 peace apiece. Last week, Midland reported that its 57-percent-owned California unit.

Two of the three companies rumored to be interested in tak-ing over Midland, BAT Indus-tries PLC and General Electric Co. of Britain, refused to comment. The third, British Petro-leum Co., called the speculation an "absurd rumor."

ny, except for certain preferred stock that is to be repurchased. The companies did not say how many shares would be involved in the

In the first nine months of 1984, Occidental repurchased or retired redeemable preferred stocks to reduce its preferred divdend payments to \$193.4 million for 1984 from \$292.5 million the previous

As a result, the company expects its common-share dividends for 1984 to be about \$2.50 per share, compared with \$2.02 per share in 1983, Occidental's president, Ray Irani, said in an interview last Occidental's chairman, Armand

Hammer, was expected to retain his title in the new company, but it was not immediately clear what role Diamond Shamrock's chair-man, William H. Bricker, would It was speculated that Mr.

Bricker may become next in line to mer, even though Mr. Hammer has given no indication that he will relinquish his iron grip on Occiden-

U.S. High Court to Review States' Bank-Takeover Laws

The Associated Press bank, Union Trust Co., and Citi-WASHINGTON — The U.S. corp., the huge New York-based Supreme Court agreed on Monday to decide whether states may choose which out-of-state bank holding companies may take over

The justices will study Massachusetts and Connecticut laws that allow such takeovers only if the out-of-state holding companies are based in New England. The Federal Reserve System,

in-state banks.

Jan. 7

while defending the two state's laws, acknowledged that they and similar agreements in other regions "might well lead to a significant restructuring of the banking industry" if upheld.

Federal banking law generally prohibits a bank holding company tors purchased a substantial based in one state from acquiring a amount of the stock, which rose to bank in another. But state legisla- \$7 a share in late 1980. tures may allow exceptions and authorize bank acquisitions by outof-state holding companies. That is what the Massachusetts Legislature did in 1982 and what the Connecti-

cut Legislature did in 1983. Both state laws, however, authorize such interstate takeovers only if the acquiring holding company is 296.25 295.25 - 7.10

NEW YORK — The stock market made a nodest advance Monday, ending a new year

slide.
The Dow Jones industrial average was up 5.85 to 1,190.81 shortly before 3 P.M. The Dow had lost 26.61 in the first three trading sessions

Advances led declines 974-530 among the 1,952 issues traded. The five-hour Big Board volume amounted to about 73.9 million shares. up from 62.9 million in the same period Friday. Analysts said some bargain-hunting in the blue-chip sector helped the stock market recover from its slump. The new year start was the worst since 1978.

Although prices in tables on these pages are from the 4 P.M. close in New York, for time reasons this article is based on the market at 3

The federal funds rate, which banks charge one another for overnight loans, was 81/2 percent at midday. U.S. Trust Co. in New York lowered its broker-loan rate to 94 percent from 94

The Federal Home Loan Bank Board said the average effective interest rate for fixed-rate mortgages fell to 13.82 percent for new single-

family homes.

Eugene Peroni of Bateman, Eichler, Hill
Richards, Los Augeles, said the stock market was "in general responding to an oversold condition presented by the first three days of the

institutional investors were relatively low on

would be a big help for stocks.

Anthony Tabell of Delafield, Harvey & Tabell, Princeton, New Jersey, said an important point to watch is the December low of 1,163.21 on the Dow Jones industrial average. If the blue-chip barometer sinks below that level, it would not be good for the stock market for the

rest of the year.

Mr. Tabell expects that level to hold, and he said on the whole stocks look cheap at current for 1985 is good.

of stock in a new holding company.

Both stocks were lower at midday. A block of 317,000 shares Diamond Shamrock shares sold at 20% and a block of 736,000 Occidental shares

Elsewhere, the oil group was mixed despite new reports of weakness in the world oil price. Those with fractional gains at midday included Mobil, Chevron, Exxon, Phillips Petroleum and

U.S. Computer Firms Strive To Interface With Chinese

(Continued from Page 7) the West to transport computers, vehicles with extra shock absorption and temperature controls. So IBM works closely with the Chinese, seeing that everything is well-padded and insulated before setting out on China's sometimes hazardous

road, rail and air network. But perhaps more than anything else, Chinese business practices frustrate Americans here. Despite repeated government irrgings to adopt a Western-style briskness in settling transactions, Chinese officials still drag on for months negoti-ations that Westerners would conclude in days. One IBM ex-ecutive recalled wistfully that he could make six or seven calls a day on U.S. customers, whereas I'm lucky here to

make one." Reaching beyond the Beijing bureaucracy to the executives whose plants and institutes will use imported computers is diffi-cult, though this should ease as Mr. Deng's policy of decentralizing economic decision-mak-ing takes hold. In the meantime, even identifying possible cus-tomers is a headache. The Chinese print no comprehensive directory of companies and plants, and there is still no nationwide telephone book.

One area where the Chinese may prove to have a unique

expertise is in the complex business of developing computers that can "speak" Chinese. The great majority of machines imported so far, as well as those being produced in China. are capable of processing the Roman alphabet only, meaning that Chinese wishing to use them in their own language must transcribe into Pinyin, the standardized system for romanizing Chinese. With more than 60,000 characters, about 10,000 of them in at least occasional use in business, industry and the academic world, finding a means of putting characters directly onto the screen without a keyboard of unwieldy size provides a challenge of major proportions.

The problem is one that IBM has been working on for at least 20 years, and it applies to other Asian languages as well as Chinese. In IBM's system, which it expects to announce next year, the first step is to "teach" the computer to analyze the stroke pattern of characters. Next it pulls a range of characters from its memory that correspond to the stroke outline punched in by the operator. With an average of less than three keystrokes, each one narrowing the choice of characters, the IBM system will produce any one of about 8,000 simplified characters on the screen.

BUSINESS ROUNDUP

Scovill Agrees to Belzberg Buyout

NEW York Times Service

NEW YORK — Scovill Inc., a consumer products company, has agreed to be acquired for \$517 million by a company controlled by the Belzberg family of Canada.

vill, especially considering its book value, which at the end of 1983 was \$19.51 a share.

The Belzbergs have interests in trust and leasing companies financial companies financial

The agreement, announced Sunday, follows unsuccessful efforts by the three Belzberg brothers — Hyman, Sanuel and William — to acquire other American concerns. In the family's most publicized bid, it failed last June to gain control of a California savings and loan institution as part of an effort organized by T. Boone Pickens, chairman of Mesa Petroleum Co.,

to take over Gulf Corp. On Friday, a Belzberg-owned company, First City Properties inc. of Beverly Hills, California, announced that it would raise a bid it made for Scovill three weeks carlier to \$42.50 a share, from \$35. That led the way

for approval of the acquisition by the two boards.

Scovill's stock, which has traded in the \$20s and low-\$30s for most of the year, climbed after the first bid was announced. Shares closed Friday on the New York Stock Exchange at \$42.25.

Analysts said the offer was very favorable for Sco-

companies financial services concerns and real estate.
When they notified the Securities and Exchange Commission of the proposed acquisition, they said they already owned 6.3 percent of the outstanding shares and were committed to taking it over.

Scovill, based in Waterbury, Connecticut, produces Yale padlocks, Nutone intercoms, Hamilton Beach irons, zippers, tire valves and many other products.

After rebounding from the recession, it earned \$24.9 million in 1983 on sales of \$743 million. It had a good year in 1984, and several months ago it estimated it would report earnings of \$3 per share to \$3.20 per share for the year, up from \$2.30 per share in 1983.

Standard & Poor's on Friday placed First City Properties on Creditwatch status on the basis of the earlier, \$35-a-share offer. That move was meant to warn investors that First City might face debt difficulties when its existing borrowing is compled with what it must pay for Scovill

Renault to Issue 12-Year Bonds for **Modernizing Plan**

PARIS - The state-owned Regie Nationale des Usines Renault will launch a 2 billion-franc (\$200million). 12-year fixed-rate bond issue, the lead manager, Banque Nationale de Paris, said Monday.

A spokesman for the automaker said the proceeds will be used for investment in modernizing the Renault model line. The bonds, to be sold in lots of

5,000 frames, will carry a coupon of 12.5 percent and an issue price of 99.50 for a gross yield of 12.58 percent. Payment date is Feb. 4. Amortization will take place in

full at the end of the 12th year, but Renault reserves the right to buy back up to 10 percent a year of the bonds in circulation. Sizeable new issues were absent

in December and there has been a seasonal building up of liquidity,

BOOKS

A WOMAN'S LIFE

Edited by Margaretha Westphal. 288 pp.

Johns Hopkins University Press, Baltimore, Md. 21218.

Reviewed by Richard Eder

S HE was a child at the rustic and unpreten-tious court of the Palatine Elector, a boisterous tomboy jumping hard off walls to see if she might turn into a real boy. She sneaked bacon-and-cabbage salad for midnight gorging and spoke her mind at every opportunity.

And at 19, through the arcane political bro-keraging of European royalty, this country mouse from a small German state, Liselotte von der Pfalz, found herself impaled upon the topmost flourish of Versailles. She was married off to the prancing, bisexual Duke of Orleans, brother to Louis XIV. Protocol decreed that for the next 40 years she would be Madame, an unwilling luminary, a sulky moon in the rays of the Sun King's court.

She hunted dutifully, energetically and fell off 27 times, dressed up and undressed before a jury of retainers, dozed through endless church and state ceremonials, was deferred to and schemed against, feared poisoning, saw her son become regent after Louis's death, and finally became the surviving grand matriarch of the French royal family.

And she hardly ever stopped thinking of bacon salad, of pancakes and sausage, of the richer quality of German butter. She sang Lutheran hymns to herself, pored over maps of Heidelberg and Mannheim, and dreamed in vain of going home.

It was one of the great homesicknesses. And through the only outlet for homesickness, this royal prisoner vented herself in a remarkable correspondence. The letters of the duchess of Orleans to her relatives in Germany are the third and least known of the three great chronicles of Versailles.

St. Simon gave us an immense and detailed tapestry, gossip sought so passionately as to transform itself into art. Madame de Sevigne sathered detail and reflection as if they were terally nourishment for her absent daughter. Liselotte, coarse, witty and yearning, gives us the insight of the outsider. The history of the past 100 years inclines us to recognize the notion of the French pushed around by the Germans. Here we see an earlier tradition: the German sensibility buffaloed by the French. Every great culture has the defects of its virtues; Liselotte kept a choleric record of Versailles' conceil, corruption and clogged drains.

The selection of letters made in 1958 by

Margaretha Westphal, and translated here by Elborg Forster, lays more stress on illuminating the character and circumstances of Lise-lotte than do previous collections, where the emphasis is upon the comical and scandalous

emphasis is upon the connear and scandarous doings at Versailles.

Not that the present edition, which vividly renders Liselotte's pithy language, scants such details. She rails against the severe Madame de Maintenon, unofficial consort to Louis in his sanctimonious latter days, calling her a trollop and a rag bag. She tells us that the court ladies would paint blue lines on their skin to simulate veins and pallor. She describes a senile courtier would paint blue lines on their skin to similate veins and pallor. She describes a senile courtier using a chamber pot for a mask at a ball, and complaining of the smell and lack of visibility. More interesting than the details, though, is the sensibility. In her letters, she would dwell the terms of the control of the letters, she would detail.

with gusto on her own awkwardness and unat-tractiveness. "My fat," she writes to her be-loved aunt, the Electoress of Hanover, "is in all the wrong places, which is bound to be unbe-coming. I have a horrendous, begging your leave, behind, big belly and hips and very broad shoulders; my neck and breasts are quite

Where later generations would think of the court of the Sun King as a high water mark of culture and taste, Liselotte recorded its murderous intrigues, the occasional poisoning and the paralyzing activity of cabals and informers. She felt herself to be a gilded prisoner, stuffed with rich French food that she detested, prevented for reasons of state security from visiting Germany and subjected to a suffocating court ritual.

At the funeral for the wife of the Dauphin. she notes how human feelings are submerged in endless ceremony: "It is amazing how hard these people are," she writes; and later, "dogs are the best people I have found in France."
The splendor of Louis XIV's reign was un-

deniable, but it was an armed splendor, maintained by iron machineries. It was, more than England or the German states of the time, a tyranny. Liselotte's letters home are often sour and sometimes self-pitying, yet there is a buoy-ancy and a wit that gives them an astringent and often affecting charm. They are doubly touching; for their homesickness, and for their simple longing to be unfettered, unwatched and free of the power games.
"I am no longer a merry little leaf-rustler,"

she writes not long after her arrival in France recalling her tomboy nickname. "In a dreadful way, I no longer feel like rustling." Later, she reflects: "A person of less cheerful disposition would probably have died of sorrow long ago. but I only get big and fat."

nine sacks. It is clear as the 49ers, 23-0 winners, head down the highway to Palo Alto for Super Bowl day, a 34-yarder, with 1:57 to play. XIX that the spotlight had been on the wrong defense.

The 49ers are a team of many

that denied the Bears at every turn. As San Francisco beat the big, bad Bears at their own game, it became apparent that the Super Bowl matchup most expected is now complete. The best team in the NFC, the 49ers (17-1), will play the best team in the American Conference, the Miami Dolphins (16-2), Jan. 20 at Stanford Stadium. The 49ers and Dolphins have played four times; Miami has won all four.

Sunday's victory did include the 49ers' patented fast start. The score was only 6-0 at halftime. In an 19for-35 day, quarterback Joe Mon-tana threw for 236 yards and a 10yard touchdown to Freddie Solomon, but the sacking, pursuing San Francisco defense ruled the

Chicago running back Walter Payton kept churning toward the sideline, looking for yardage that didn't exist. Quarterback Steve Fuller kept ricocheting between de-fensive linemen. And the only pass that came near former Olympic sprinter Willie Gault slid off his hands into those of Dwight Hicks for an interception.

Payton, Fuller and Gauli were the men the 49ers were trying to stop, linebacker Keena Turner said. Payton gained a respectable 92 yards on 22 carries, but Gault was shut out and Fuller was 13-of-22 for 87 yards. The Bears gained just 186 yards, which sometimes is a good day for Payton alone.

"As a defense, when we had a 6-0 lead at halftime, we told ourselves that was all our offense was going to get," Turner said. "We had to

The 49ers sacked Fuller eight yard drive collapsed when Bob any offensive balance they were SAN FRANCISCO—If some times and even got Payton once, for Thomas missed 41-yard field-goal trying to achieve, "Our theory was attempt. Chicago never really to keep everything underneath and let the linebackers help at the line," said San Francisco cornerback Eric

make the difference here Sunday, shutout in the NFC title game was season we were able to avoid the quarter on one of those "gadget" plays the Bears use now and then. Reserve guard Guy McIntyre lined up next to Tyler in the backfield to utes off the clock on its first posses- block, and Tyler ran nine yards around the right side for a touchone to Matt Subey for 15 yards out down and 13-0 lead with 8:27 re-

The Bears, feebly mounting what became their final comeback try, the day.

They never really made a big co 22 before two consecutive sacks pushed them back to the 40 and nto a punting situation.

The 49ers took over on their 12 and drove straight to another touchdown, the 10-yard pass to Solomon, as Montana stayed with what had worked all day - rolling out of the pocket to avoid the blitz coming from the "flop" defense that puts eight men on the line. Cornerback Mike Richardson, trying to defend Solomon on the TD play, got hung up when Solomon broke to the outside as Montana rolled out.

The touchdown gave the 49ers an insurmountable 20-0 lead with 11:15 left in the game.
In the week of pre-game hype

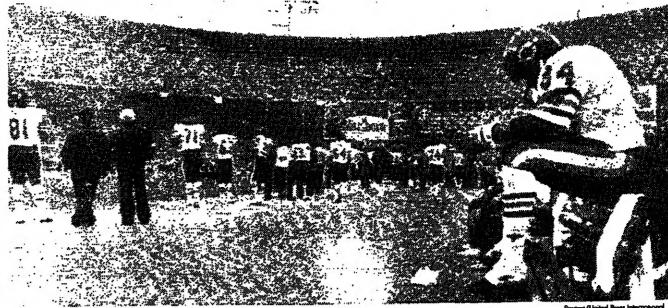

the Bears had talked and the 49ers had listened. "Everyone kept talking about the Bears' defense, the Bears' defense, the Bears' defense," said Montana in the winners' dressing room Sunday. "What they didn't realize is that the best defense is right over there."

"We heard all those stories about the Bear defense," Wright said. "That was the key. Those guys were very vocal in the press. That was the motivating factor."

Defensive end Dwaine Board, who crushed Fuller on a sack, said he'd read that San Francisco's is a "finesse" defense. "Nobody should call us a finesse defense." he said. 'We didn't make this personal — it wasn't a grudge match. But we play hard."

Payton this season became the NFL's all-time rushing leader (13,309 yards). Thinking his time had finally come, he had promised victory. In defeat he wore a dazed,

wounded expression. "I'll never get over this," he said softly. "You've got to realize, in 10 years this is the closest I've been. To get this close

Walter Payton in the final minute: 'In 10 years, this is the closest I've been. To get turned back. . . . It's hard to deal with.

Decker Will Get a Running Start on 1985

By Robert McG. Thomas Jr. New York Times Service NEW YORK - Mary Decker, the leading U.S. female middle-distance runner who suffered two sumning upsets last year, has fully recovered from the collision that knocked her out of the Olympic 3,000meter final in August and has set her sights on an even more dramatic return to competition this month. She plans to try for three different indoor world records in a row in what is shaping up as a series of geteven races against opponents who beat her in outdoor events last year.

At the Sunkist Invitational at the Los Angeles Sports Arena on Jan. 18, the 26-year-old Decker will try for a record in the 2,000 meters against American Ruth Wysocki, who upset her in the 1,500 meters at

the Olympic trials last June.
At the Millrose Games at Madison Square Garden on Jan. 25, she will try to break her three-year-old world indoor record of 4 minutes 20.5 seconds in the mile against Wendy Sly, the Briton who finished second in the Olympic 3,000 after Decker fell in the famous collision with Sly's teammate, Zola Budd.

Two weeks after that, at the Vitalis-United States Olympic Invitational in East Rutherford, New Jersey, she will try to break her record in the 1,500 meters against Maricica Puica, the Romanian who won the gold medal in the Olympic 3,000 while Decker, the pre-race favorite, writhed in pain with an injured hip on the Coliseum infield.

Decker has made no public comment on her goals, and her coach, Dick Brown, stops short of predicting that she will set three world records in four weeks. But he made it clear over the weekend that Decker is in top

condition and will be going all out.

"There'll be no holding back," he said. "Within a few days after she fell, she decided to turn it into

something good. This could be a springboard that could carry her

through the next five or six years."

NBA FOCUS

up as a major effort for 1985 aimed at the International Grand Prix meet in Rome on Sept. 7.

"We looked over the schedule and decided that would be the race to shoot for," Brown said. "All the best runners will be there."

"She's very hungry," declared Don Franken, the assistant director of the Sunkist, who said the meet's schedule had been altered at Decker's request specifically so she could face Wysocki and set up the possibility of breaking world indoor records in three different events in the span of four weeks.

Decker had originally been listed for the mile at the Sunkist and Wysocki had entered the 880, but at Decker's behest the mile was replaced with a rare running of the 2,000 meters and both women entered

"She really wanted to run against Wysocki, and the record in the 2,000 is kind of soft," Franken said, noting that the top time of 5:43.30 had been set by a Soviet runner, Yekaterina Podkopayeva, at a Moscow race on Feb. 12, 1983.

Decker's best time over 2,000 meters was an interim clocking of 5:52.2 during a two-mile race at the 1983 Sunkist

Ray Lumpp, the director of the New Jersey meet, said he had also changed his schedule at Decker's request so she could try for a world record in a third event following her efforts in the Sunkist 2,000 and the Millrose mile. Lumpp said a scheduled mile race was dropped and replaced by the 1,500, the so-called metric mile," in which Decker will try to beat her world record of 4:00.8, set at the 1980 meet, and break the four-minute barrier.

Brown said that his only concern is that Decker, after two months of hard training in Eugene, Oregon, is in such good condition that she has a heightened

susceptibility to injury.

With that in mind, he said, after her marriage last week to Richard Slaney, the British discus thrower who had carried her out of the Coliseum in his arms after she fell in the Olympic 3,000, Decker eased up on As a result, he said, what had been planned as a low- her training a bit, but plans to resume a full schedule key year of competition for Decker was now shaping this week to prepare for the three indoor meets.

Cigarettes: Why Smokers Stay Hooked

By Sandra Blakeslee

mounting evidence that cigarette smoking is a colossal threat to personal health, this year a third of American adults will persist in puffing away on nearly 600 billion cigarettes. Four out of five of these smokers say they want to quit but, after numerous attempts, find that they cannot.

Why? What gives cigarettes such a powerful hold on people and why do so many people go back to smoking after months of Recent research into the ps

chology and pharmacology of nicotine is beginning to explain the remarkable persistence of smoking behavior. The addictive drug appears to have unique properties that make it "perfect" for coping with the vicissitudes of life. The tenacity of nicotine dependence stems from the wide variety of effects it exerts on the brain and nervous system and the wide variety of circumstances in which the smoker uses cigarettes.

Details of these properties are described in the December issue of Neuroscience and Biobehavioral Reviews. Smokers stay booked for a variety of reasons.

One powerful inducement to continue smoking is to avoid the discomfort of nicotine withdrawal. However, to almost all smokers, 10 cigarettes a day are enough to prevent withdrawal symptoms. Any cigarettes above that number are smoked to provide pleasure. This is because nicotine literally alters the availability of important brain chemicals involved in feelings of reward and well-being. There is evidence that cigarettes make task performance easier, improve memory, reduce anxiety, increase tolerance of pain and reduce hunger.

Nicotine produces these temporary improvements in performance and mood in a remarkable two-step process. Depending on how the cigarette is smoked — short pulfs versus deep drags —

the smoker is aroused or calmed. Smokers can adjust nicotine intake to selectively enhance these effects. Nicotine is a self-administered drug that, unlike alcohol or marijuana, has short-lived effects that do not interfere with normal social activities.

Different personality types choose alternative forms of tobac-NEW YORK — Despite co to promote one nicotine effect over another.

While smoking seems to bestow nowerful psychopharmacological benefits, it carries such highly lethal bealth risks that many nonsmokers find it difficult to understand why anyone continues to smoke in the face of what is now

known about smoking hazards. Dr. Richard Pollin, director of the National Institute on Drug Abuse, says cigarette smoking is now the most serious and most widespread form of addiction in

reason why many smokers cannot break the habit, it is not a complete explanation. If smokers were just smoking to maintain a minimum level of nicotine in their bloodstreams, Dr. Pomerleau said, they would smoke by the clock to keep their "nicostat" satisfied. Studies show that 10 cigarettes a day will satisfy this need in nearly all smokers. Then why do many people smoke more than half a pack a day?

Anyone who watches smokers. Dr. Pomerleau said, recognizes there are powerful interactions between smoking and environ-

Recent research into the psychology and pharmacology of nicotine is beginning to explain the remarkable persistence of smoking behavior

the world. He asserts that it is even worse than heroin.

The foremost preventable cause of excess death in the United States — smoking — is rarely mentioned on the death certificates of its victims, now numbering more than 350,000 deaths per year," Dr. Pollin said.

Smoking kills seven times more people each year than automobile accidents, he said. The Environmental Protection Agency now lists tobacco smoke as the United States's most dangerous airborne carcinogen. How cigarettes dam-age heart, lung and other vital tissues is widely discussed in the medical literature.

Nevertheless, "virtually all physicians know of colleagues, even chest surgeons, who remain so greatly addicted to cigarettes that they are unable to discontinue smoking despite the presence of serious, progressive, tobacco-related illness," Dr. Pollin said.

If there are chest surgeons who cannot stop smoking, there must be mighty powerful reasons compelling them to smoke.

In the neuroscience journal, Dr. Ovide Pomerleau of the Veterans Administration Medical Center in Newington, Connecticut, and the nearby University of Connecticut School of Medicine, reviewed scores of recent studies on the nature of cigarette smok-

mental stimuli. Smoking is extraordinarily toxic and people would not do it unless they derive something beneficial from it.

"Nicotine taps into powerful biological processes," Dr. Pomerleau said. "It is unwise to underestimate the power of it just because it does not produce a dramatic state of intoxication."

New research is showing that nicotine affects the synthesis, release and turnover of a wide variety of brain chemicals that are fundamentally involved with mood and behavior. It is being studied in conjunction with a host of brain substances and structures the so-called classical neurotransmitters, receptor sites, neur-opeptides including endorphins, and pituitary hormones.

The emerging picture is that a smoker can fine-tune the way his or her brain responds to the events of daily life. That makes nicotine a powerful substance, indeed. As one of Dr. Pomerleau's patients once lamented: "O.K., doc, you've taken away my best friend. What are you going to give me in its place?

According to the American Cancer Society, 87.5 percent of regular smokers report they find smoking pleasurable. A number of investigators believe nicotine stimulates pleasure centers in the may be involved. Studies have behavior

linked the effects of nicoune and amphetamines.

Demands to perform well, particularly for tasks requiring increased alermess, are among the most frequently reported reasons given for smoking. Smokers say rigarettes help them think and concentrate. Studies are upholding the notion. There is some evidence that

nicotine from smoking improves long-term memory. The mechanisms are unknown but involve brain substances that are under intensive study today. Other studies of both humans

direct calming or anxiety-relieving effect. Some of the neuroemical pathways that could mediate this are being defined. Nicotine has been shown to increase tolerance of pain in humans and animals. It also tends to

make humans and animals eat less sweet-tasting, high caloric While such biological effects of nicotine are profound, the way it is delivered to the brain further reinforces the hold it has on peo-

ple. Within seven seconds of pulfing a cigarette, a quarter of the nicotine in inhaled smoke enters the brain. The delivery is quick and hits like a spike. To the smoker, this means the wanted effects of nicotine are

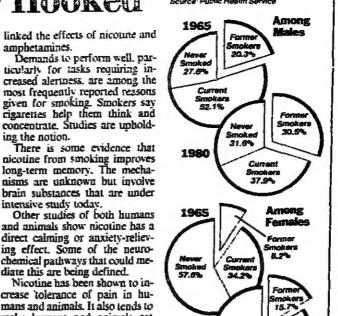

available on demand. Furthermore, the way the smoke is inhaled affects the response. Studies are showing that short, quick puffs - low doses - tend to stimulate or arouse brain function and behavior. Deep, full

drags - high doses - create the more sedative, relaxing effects of This may mean that different personality types use smoking to reinforce preferred behavior patterns. Type A people (competitive, impatient, hostile) might take shorter, smaller pulls to enhance arousal. Type B personal-

ities (relaxed, less achievement-

orientated) might take larger

pulls to promote relaxation. Similarly, pipe and cigar smokers, who absorb much of their nicotine through mucous membranes in the mouth and consequently receive a steadier, slower dose to the brain, could select the brain and some suspect the body's tobacco delivery system that most own "morphine," or endorphins, fits their personality, mood and **Quitting Proves Hard**

The recent research into nicotine and the brain points to new ways of treating the addiction, Dr. Pomerleau said. A special chewing gum that contains nicotine, for example, has been introduced in the United States.

1980

Several laboratories are search ing for substances that chemically and selectively block nicotine's effects on the central nervous sys-

But ultimately, in Dr. Pomerleau's view, any treatment will have to include behavior modification techniques that help former smokers cope with signals from the environment that are associated with smoking.

The reason smoking is so insidious, Dr. Pomerleau said, is that it affects many different brain regulatory systems simultaneously And as it affects many moods and types of performance, it is adopted into the performance of an enormous variety of daily tasks. It becomes a crutch, capturing the normal adaptive regulatory systems of the human brain.

There is no single explanation for smoking and there is no easy cure, Dr. Pomerleau said. Nor is it likely there will ever be a safe cigarette, he added.

Fans of Elvis Presley Mark His 50th Birthday

The party was a few days early, but that didn't stop some 400 Elvis Presley fans who gathered to cele-brate their idol's 50th birthday. They came from as far away as Japan and Germany Saturday. And before the night was over, they applauded plans to build an Elvis Presley memorial fountain to be financed by contributions from his fans. Presley. who died of a hearr ailment Aug. 16, 1977, would have been 50 today. The fountain will be constructed in what is now a small shopping center across the street from Graceland, Presley's mansion in Memphis.

Doctors removed a small portion of the left lung of Princess Marga-ret, Queen Elizabeth It's younger sister, but it proved "innocent," the princess' office announced Monday. The princess was admitted to Bromoton Hospital in West London on Saturday and the surgery was performed there on Sunday. Her doctor said she could leave the hospital "within the week." Published reports said Margaret, 54, a heavy smoker, had been suffering from chest pains and difficulty in breathing. She was last reported hospitalized in 1978 suffering from hepatitis and gastroenteritis... The actor Broderick Crawford is recovering at the UCLA Medical Center after suffer-

ing a mild stroke New Year's Eve. ... Surgeons amoutated the left arm of rock star Rick Allen, four days after the arm was severed in a car crash and then sewn back in place, a spokeswoman for his recording company said. Allen, 21, drummer for the British band Def Leppard, was later reported in stable condition at the Royal Hallamshire Hospital. The arm was ripped off in a car crash near Sheffield, England... Doctors operated on Brazil's President João Baptista Figueiredo, 66, to relieve his severe back pains.

Princess Caroline of Monaco and her husband Stefano Casiraghi abandoned the Paris-to-Dakar rally race after their truck overturned in Algeria, race sources said. The sources said no one was injured when the couple's 15-ton truck, with Casiraghi at the wheel, flipped onto its right side after running off a sandy track Friday. The race began New Year's Day.
